Palo Alto, California

Dear Josh:

There obviously is just too much going on in the world of science these days. Our Conference is now irretrievably set for October 14-17. I note with great satisfaction that by careful scheduling you can just make the other one. Penalties for senior citizenship grow more onerous each year. When you arrive at a satisfactory solution, do let me know.

Best regards,

  
James V. Neel, M.D.
